Professional Summary

Junior Full-Stack Developer with a BCA in Computer Applications and hands-on experience building full-stack web applications using Python, Django, DRF, React, and PostgreSQL. Skilled in REST API development, database design, authentication systems, and deploying production-ready web applications.

Technical Skills

- **Languages:** Python
- **Frameworks:** Django, Django REST Framework, React.js
- **Databases:** PostgreSQL, MySQL, SQLite
- **Tools & Platforms:** Git, GitHub, Postman, Vercel, Render, Cloudinary, Razorpay
- **Concepts:** REST API Design, JWT Authentication, TF-IDF, MVC Architecture

Education

Mahatma Gandhi University

Aug 2022 – Apr 2025

Bachelor of Computer Applications (BCA)

Experience

Python & AI Intern – GrapeGenix Technical Solutions Pvt Ltd

Nov 2024 – Mar 2025

- Developed backend features for a Django-based production web application.
- Built REST API endpoints consumed by frontend applications.
- Supported AI-based feature testing and Python integrations for internal tools.
- Created database models, migrations, and handled ORM queries.

Python Django Full Stack (Trainee) – Luminar Technolab, Kochi

May 2025 – Dec 2025

- Developed and deployed full-stack web applications using Python, Django, DRF, React, and MySQL.
- Implemented secure authentication systems (JWT, Token Auth) and optimized backend queries.
- Built CRUD modules with Django Models, Forms, and REST Serializers.
- Performed API testing using Postman and handled version control using Git/GitHub.
- Deployed web applications on cloud platforms and collaborated in Agile development cycles.

Projects

AI Resume Analyzer & Rewriter

GitHub

- Built an ATS-style resume analyzer using Django and React.js to parse resumes and compare with job descriptions.
- Implemented TF-IDF keyword matching to identify skill gaps between resumes and job postings.
- Integrated Grok API to rewrite weak resume sections and generate improved content in real time.
- Developed PDF upload and text extraction feature for automated resume analysis.

Social Media Web Application

GitHub | Live Demo

- Built a full-stack social platform with DRF and React.js supporting posts, likes, follows, and profiles.
- Implemented JWT authentication with protected routes and token refresh handling.
- Integrated Cloudinary for media uploads and deployed backend on Render and frontend on Vercel.
- Built admin dashboard for content moderation using Django admin with custom views.

Achievements & Certifications

HackerRank Certificates: Python (Basic), SQL (Intermediate), CSS (Basic), Problem Solving (Intermediate)
